1. Link to the scammers profile. This is to prevent confusion if a username change occurs.

<https://hackforums.net/member.php?action=profile&uid=492684>

2. Link to the thread in question if it exists where you may have been scammed.

<https://hackforums.net/showthread.php?tid=922436>

3. Search Scam Reports area for any existing threads with the scammer. Search by username and also uid. If everyone adds the users profile then UID will be very effective.

Didn't find any, but his thread is filled with people claiming they didn't get their account activated.

4. Post any images/screenshots that you can provide as evidence of the scam. Best option is to use the spoiler tags for images.

That was the msn conversation we had. After it ended like that and he went offline, I posted that picture on his thread a few times. Each time I posted it, I asked him to respond. He never did. And now he's givin me -rep which sucks because I'm trying to get a crypt from someone and they are asking why I have -rep. And on top of all of this, he deleted my login on his maniacbooter site.

Orgy - January 18, 2011, 5:20 pm

I don't see how he scammed you. Of course its weak, they don't check their shells. Their shell count is inaccurate as hell

But they didn't scam you.

Tsgh Mike - January 18, 2011, 5:32 pm

This isn't a scam you bought shells you should have investigated some.

He's a scammer Mike. Read the last post in the thread-

(Jan 18, 2011 12:51 PM)Maniac Booter Wrote: [\[CITE\]](#) FFS... Ill tell you the problem

1. WIZ IS NOT THE OWNER I AM

2. Wiz has made approximatly \$500 of which I have recieved \$15

3. The shells are dead

When I actually recieve the 50 % of that wiz owes me the booter will be working again... But for Now I can not afford anymore shells as wiz technically owes me about \$250 !!

Sorry man you got ripped off by that guy and I doubt he'll refund anyone>>

Tsgh Mike - January 18, 2011, 6:30 pm

Show proof of payment as well please.

wisd0m - January 18, 2011, 6:31 pm

You seem to have been partially ripped off but not scammed IMO.

Ag3nt - January 18, 2011, 6:42 pm

His "IPFinder" doesnt work

Try it

And his "Nether Stealer" is a scam

Sanctuary - January 18, 2011, 7:36 pm

You get what you pay for you shoulda bought twbooter much more accurate ManiacBooter is know where near 1000 shells.

binahu - January 18, 2011, 11:59 pm

Read the last 8 words of my first post please, and then please explain how that's not a scam...

Read the last 8 words, here I'll post them again just for you sweetheart.

he deleted my login on his maniacbooter site.

And how can you even say they didn't scam me. When I first bought your twclient, all was smooth until you deleted my hwid off your system and didn't refund me. Remember that?

Of course I won't forget to mention that I got passed the 1st of the 2 security checks (AFTER you deleted my hwid). Don't come here to troll about someone not being a scammer, when it's clearly a scam + you pretty much did the same thing to me with twclient. -.-

Tsgh Mike - January 19, 2011, 12:04 am

You may have broke a TOS look at them and make sure.

I already bought twbooter client, the support sucked.

I didn't break the TOS. I think he removed my login because I posted that msn screenshot on his thread.. as you can see:

<https://hackforums.net/showthread.php?tid=922436&page=70>

Jeeze, who let the downies out of their cages -.-

Here's the -rep he gave me:

WIZCRAFT (169) - Last updated 01-14-2011, 01:22 PM

Negative (-3): Not at all trusted user. Not even a good member. Can't wait!

Tsgh Mike - January 19, 2011, 12:12 am

I am not a "Downer" I defend both sides unless one has a sufficient evidence.

I didn't break the TOS.

(Jan 18, 2011 07:30 PM)tsgh mike Wrote: [\[CITE\]](#) Show proof of payment as well please.

I did buy the booter. Here's the proof:

This is a scam, I bought access to his shells and was provided a username/password for the access. The username/password is now removed.

You defend both sides unless one has sufficient evidence, WELL I'VE POSTED SUFFICIENT EVIDENCE. What has wizcraft posted to counter it? Oh, that's right.. NOTHING! I see through your lies "defend both sides", downie.

shane - January 19, 2011, 2:27 am

same here i just paid and relised people havent been getting there service i asked for refund and no reply

[img]http://img812.imageshack.us/img812/1660/70109190.png[/img]

WIZCRAFT - January 19, 2011, 3:31 am

You also massively abused the system and I banned you on the basis of that. I've got the attack logs as a proof. No scam, nothing.

shane - January 19, 2011, 3:36 am

you still scam as i not got a refund and not had a reply back since and people have said your host is down or doesnt work

ok i getting one setup but does it work as people saying it doesnt

If you broke his TOS, then he has every right to delete your account. twBooter is completely off

topic, but since you insist:

If I removed your HWID, it was probably due to a good reason. Secondly, the first of the two security checks didn't check your HWID.

shane - January 19, 2011, 6:49 am

still no account msg to short

Webman.io - January 19, 2011, 8:56 am

I bought this too.

And yes, it sux as hell.

But it is not a scam.

Sorry.

DaL33T - January 19, 2011, 9:18 am

He almost scammed me over a microsoft key. But now all is well.

I don't vouch for him though, he can get really annoying.

Webman.io - January 19, 2011, 9:25 am

I agree, he is pretty annoying, but it is not scamming.

Jose"the real 1" - January 19, 2011, 9:26 am

and it seems that the staff of the booter are fighting among each other!!!

shane - January 19, 2011, 10:27 am

i got my account but it dont seem to boot any site offline at all

Webman.io - January 19, 2011, 12:17 pm

(Jan 19, 2011 11:27 AM)shane Wrote: [\[CITE\]](#) i got my account but it dont seem to boot any site offline at all

Did he told you that it would put the site offline?

Also, I readed that it may only attack the victim site for 120 seconds max.

That is pretty shitty.

shane - January 19, 2011, 12:27 pm

i did try a boot attack and doesnt knock a site offline at all and loads have complained as i can see

and why carry on selling when the bloody thing doesnt work its like having a hosting sale and server was down and you took people money they going to want it back as its no good to them if it doesnt work

Webman.io - January 19, 2011, 5:20 pm

I used this myself.

And it took down a site for about 10 seconds.
Lol, I know.

But then it still boot it down, so I am sorry to say that is isn't scamming.

If you still think that there are problems with this you should try contact the real owner of this booter.

<https://hackforums.net/member.php?action=profile&uid=129814>

He might help you, I hope.

shane - January 20, 2011, 4:09 am

this doesnt even knock a site off for even 2sec never mind 10sec
i tryed this even on a none protected vps i dont use anymore and it didnt touch it

?ntel - January 20, 2011, 5:10 am

Yeah I just bought this, and it's probably the worst \$5 I've ever spent - it doesn't work and my PM's aren't being responded to.

Gooples - January 20, 2011, 5:35 am

Take it this way, if you were a coder and took all the 'time' to 'code' it, would you sell it for \$5 lifetime? No.

shane - January 20, 2011, 10:18 am

ye but hes a scam as he taking money and he knows very well it doesnt work so i reckon everyone here make a claim because is paypal will get freezed

Welfare - January 20, 2011, 10:51 am

It didn't even last a month, lmao.

?ntel - January 20, 2011, 5:58 pm

Yeah I want to charge-back but won't because I don't want a scam report - even though I was sold something that doesn't even work.

Webman.io - January 22, 2011, 8:06 am

Sorry but it is not scam at all.

It is just not working that good, but still working.

The features are limited, as you can only take down a site for few seconds.

So please get this thread closed.

shane - January 22, 2011, 8:17 am

take down a site more like your sticking up for the guy it doesnt work at all i even tryed on load of sites and still didnt knock them off for even a sec or anything lol

Well, if this is true then you must gives some proofs.

Also beware that some servers have protections from this, so that might be the reason.

binahu - January 25, 2011, 8:22 pm

Please post me proof that I abused your system wizcraft. I didn't hit the same IP more than twice in 5 minutes...

Crosshairs - *January 25, 2011, 8:32 pm*

WIZCRAFT has scammed me aswell the booter never worked when i bought it and i was not told it did not work aswell and he was more than glad to take my money and not tell me about this issue
