Welcome to the FreeGFX Thread

I've taken notice to all the new artists in the Rate My Graphic section, and I've decided to help out. I'm now offering GFX classes ABSOLUTELY FREE. These classes will be public, and everyone who is registered on Hackforums will be able to view them. I'll be posting a new tutorial every week-2 weeks, which will contain a lesson (in tutorial form), a resource pack (which would include a mix of stocks, renders, c4ds, and .PSDs required for the lesson), and possibly a video lesson depending on the topic.

There will be anywhere between 5-10 lessons, each one covering a different aspect of graphics, with personal tips and tricks. Hopefully this will help a lot of people with their graphics progression, and give new artists a solid foundation to start with :). The skill range for these lessons will be beginner to intermediate. In the future I may create a more advanced series of tutorials and sell them.

This thread is merely an announcement, to tell everyone what is coming. I hope you all benefit from this :).

Lessons Now Available:

[Prologue: Getting to know the Photoshop layout.](#)

[Lesson One: Creating a Basic Signature](#)

Been too inactive in graphics to help in your lessons, though I'd love to read the tutorials and perhaps become semi decent again.

Thanks for your effort in the tutorials, reading lesson one.

Valik ? - January 20, 2011, 4:56 pm

How long have you done graphics?: 7 years (i mean, i know its alot, but total time is about 6-7 months)

Thank you to everyone who has applied. I'm closing applications, as I decided I'll take this on solo. I may receive help from a select few later on in the class, but for now I'll be managing this project by myself.

Thanks guys!

That's actually a decent idea.
Although, you should create a thread and ask people what would they like to see.

I probably will a few lessons down. I'm starting off by hitting all of the basics, and trying to introduce a well rounded knowledge of graphics first. I'll start taking ideas from people probably around the 5th lesson down.

-DeLuXe- - January 20, 2011, 5:42 pm

This is an awesome idea. Good luck in the future!

Sorun - January 20, 2011, 8:11 pm

This sounds great ! Lately I have been just rage quitN PS because I don't find any of my sigs acceptable.

zyvox - January 21, 2011, 11:17 am

That is one epic tutorial - so detailed and nice.

Keep this up - this is GOLD for beginners AND "advancers".

HisToRiia - January 22, 2011, 6:09 am

Amazing tutorial ! Thanks alot, helped me get more into it . Still having problems on the text will check out your Text tut . (: Thanks again .

Rhythm - January 22, 2011, 6:56 pm

Prologue added, hope it helps clarify things.

New artists should view that before attempting the first tutorial.

Ryuku - January 23, 2011, 1:12 pm

Thank you for your hard work. I'm sure I'll learn a lot from these lessons.

Mermaid - February 2, 2011, 2:18 pm

What types of lessons will be given as I want to progress in my Gfx work.

C4Ds will be covered in the next lesson, when I get around to making it.

Praefectus - February 8, 2011, 3:02 pm

Have you forgotten to update this?

DeMeR - February 9, 2011, 4:53 pm

When will you be done the C4D lesson? I really want that one.

Wormag - February 11, 2011, 8:33 am

I hope there is a new one soon.

Rhythm - February 11, 2011, 1:47 pm

I haven't forgotten, I just haven't had the time I thought I would.

Pre-cal has been a lot worse than I'd previously anticipated. That and a combo of other things is causing my lapse in activity. It may be a few weeks before I find enough free time to create a [GOOD] class.
