Starting this week, HF News will be operated by the Red Lions. This is just one of the many projects we do to help HackForums. Although one of our helpers are not from Red Lions the user "Zeon" helped us out.

Hope you enjoy this week's HF Edition!

[img]http://img269.imageshack.us/img269/8496/headlinesr.png[/img]

The Ex-Admin [Hanzo](#), has returned as an Admin. Veterans of HF know whom [Hanzo](#) is, but for new joiners, [Hanzo](#) is a real life friend of [Omniscient](#), and was an admin a few years ago. Upon his return, it appears many veterans of HF believe Hackforums.net will change for the better. Time will tell, either way, welcome back [Hanzo](#) Keep in mind everyone [Hanzo](#) is in charge of Rep Abuse, so be sure to PM Hanzo regarding reputation abuse and not [Crow](#) or [Omniscient](#).

Staff section, Junk section, and all private groups threads were visible to everyone on HackForums. To the people who were on for those lucky 20 minutes, got the chance to view staff section and what they "Gossip" about. As [Crow](#) states, the event that happend is like "Santa leaving his bag at somebody's house" As for staff and [Omniscient](#), they have felt upset that the section was viewable to everyone. [Click here to view thread.](#)

On behalf of HackForums, we would like to give a warm congratulations on the HackForum's community for achieving to hit the 8 MILLION mark on the post statistics. If it was not for the great success [Omniscient](#) has done to this site, we would not have been able to come this far.

The new Official HackForums Group, The Red Lions, has seen its first accepted applications in the past week. Currently, we have maxed out on the wanted number of members for the new High Quality group. Here are the words of Red Lions leader [T?chnology](#) on the matter.

(Jan 19, 2011 03:42 PM)T?chnology Wrote: [\[CITE\]](#) Recruitment is still open , we maxed out on members ..

so every week inactive members will get kicked and new applicants will be given a chance....so you can apply via user cp , including link to your app.

The recruitment thread is still open and you can locate it [here](#).

So, if you are still itching to join the new group, just wait, you may get accepted in the coming weeks!

HackForums.net owner, [Omniscient](#), has set up an Official FaceBook Page for those who wish to connect with HackForums on Facebook. In addition, a new Help Document has been added, entitled [Social Connections](#) and can be located [here](#). Currently, you can connect with HackForums via [Twitter](#) and [FaceBook](#), where you can find all the latest updates on [HackForums.net](#).

[img]http://img211.imageshack.us/img211/300/usernews.png[/img]

Staff member [Skill](#) has recently re-opened the Reviewers' recruitment thread. While recruitment has re-started, only ub3r members may apply. You can read more about it here: [Apply to the Reviewers](#). We wish [Skill](#) the best of luck, as he is entrusted with selecting the members that will make the HF Marketplace even better.

[Nowaythen](#) has been trolled successfully trolled by what we called "HackForum's first Successful Troll" When I quote "HackForums" I do mean that many people were all helping each other in trolling this user to believe that the FBI will be knocking down his door, due to the fact that he clicked the "Credit Card, Paypal, Identity, and Bank" section that led him to the Fbi.gov official website. He seemed to be really scared so his first response was to make a thread in the lounge asking what would happen. [Click here to read more](#)

Binahu has opened a scam report against [WIZCRAFT](#), the maintainer and seller of Maniac Booter. While he does not have much proof, he does have the back-up of many members who claimed to have been scammed as well. You can keep track of how the scam report develops by going here: [Scam Report](#)

-

[Smokin3000](#) has just released the latest version of Mange, his IRC bot, to the HF marketplace. It's rare to see a program coded in Delphi being sold in the HF Marketplace, as most programs sold there are coded in Visual Basic. If you would like to buy a copy, wish him luck with sales, or just view the sales thread, go here: [Mange IRC Bot](#)

[crusher2003](#) has been permanently banned for selling free ebooks. [Skill](#), the staff member that banned him, proclaimed that he had already been issued several warnings. We would like to congratulate him for dealing with the issue rapidly. You can read more about it here: [Regarding crusher2003](#)

[img]http://img199.imageshack.us/img199/6619/othernews.png[/img]

It was brought up in discussion during the week as to whether it was arrogant to have the suggestion section closed, disallowing members from contributing their ideas to Hackforums.net. The topic was raised by [Dr.HoboZombie](#), and had replies from members, staff and [Omniscient](#) himself. As to not take sides, it's best you read the thread yourself, [Click here to view Thread](#).

The member [Killm3](#), here at Hackforums.net has apparently managed to find an exploit in Youtube which allows videos to be posted without logging in. As of yet, he hasn't shed light on to this exploit, as he's hoping to get praise from Youtube/Google to be put towards his College application. The exploit thread can be found [here](#).

The staff member [Saged](#) has temporarily banned all conspiracy threads from being made in the SRRP section. It is questionable as to how long it will last this time, as previous bans like this haven't lasted. The thread with more about the ban can be found here, [Saged thread regarding conspiracy threads](#)

[PyScHo.HackEr](#) is offering a website scanning service. He will scan any website for vulnerabilities free of charge. You can visit his thread here: [WARNING: Potential SPAM or INFECTED LINK thread](#)

hack_addicted.pt has released his SQLi Online Scanner. He states that it is much better than an .exe tool and that it produces more dorks. You can read about it here: <https://hackforums.net/showthread.php?tid=966617> He also provided a guide on how to use it here: [WARNING: Potential SPAM or INFECTED LINK thread](#)

[emiak](#) has released a virus scanner with which you can scan suspicious files using the popular

scan4you.biz. The great advantage of this is that all scans are paid by him, so you have nothing to pay for. You can download it here: [WARNING: Potential SPAM or INFECTED LINK thread](#)

[morgan150](#) has released the popular Galaxy Crypter for free. There are mixed opinions about this incident; some thank him for it, while others are angry at him for leeching members' private programs. You can read about it here: [Click here to view thread](#)

[1qq23q](#) has released his "Hacker's Toolkit 1.0". While it may look like a simple program at first, it has many functions suited for different needs. Among it's features are a MD5 decrypter, a binder, a web browser and an MSN freezer. If you would like to have a look at the program and or download it, go here: [Click here to view thread](#)

Welcome to HF's White Hat part of HF News. I am Disruption and I will be writing this part of the news.

This area is to discuss information that occurs in the White Hat Help area and the HJT area. Now lets begin with some events' that have occurred that brought our attention.

I would like to welcome back [tsgh mike](#) to the White Hat Help area. He has been doing a lot and assisting other members that work in that area as well. We wish him the best of luck and hope he continues what he is doing.

We would also like to also thank [Infallible](#), [Cobija](#), [Paradoxum](#) and [Tha Sneak](#) for taking many logs. Without them at this time, the HJT area may have been a mess.

[Infallible](#) has brought back "Tip of The Week" for the HJT Area. With this being brought back, it has helped helpers' and trainees' in live logs' and in practice logs'. Thank you Infallible for bringing back "Tip of The Week". You can view his recent tip [HERE](#).

[Cocopara](#) has informed us that a tool known by the name of "Unhack Me" has been tested and he concluded that the tool very difficult and annoying to use. According to [Cocopara](#) , this tool has detected viruses that it said it had "removed" in an earlier scan. This could mean that "Unhack Me" is unreliable for security purposes. You can find this thread [HERE](#).

[Cobija](#) has released an excellent tutorial describing a command prompt known as Netstat. Netstat commands allow a user to identify connections to the internet. With proper help, a user can identify a rat with this command prompt. If you would like to see the tutorial and learn how to use it, you can find it [HERE](#).

We would like to welcome back [Dragon Hawk](#). He has been accepted once again to be apart of the HJT Team. He shall be starting Practice Log 1B. We wish him the best of luck in completing his training.

For those of you who would like a chance to be apart of the HJT Team, please view [THIS](#) thread.

Zeon - January 20, 2011, 7:58 am

Screw you Ectoplasm. A helper? I did half of the news. I did user news, hacking news, the interview, the introductory paragraph, almost everything. This is outrageous. I send you 2/3 of the news, and you post it before me so that you can get all the credit, when HF News gets posted on Saturdays and when it was scheduled that I was posting this edition. Take all the credit, will you? This is NOT what was acorded.

Zeon - January 20, 2011, 8:54 am

It's a big deal because he got my work and claimed it as his. He hasn't done 1/3 of it.

Zeon - January 20, 2011, 9:02 am

Yes, but helped is not accurate. More like "did half of it". Also, I was the one meant to post it this week, not him. I've kicked him out of the crew, I'll be posting the news from now on.

Bro, to be honest, you are taking it overboard.

No offense to the OP or you but...

Honestly, I doubt anybody who reads this post will remember the Original Poster's username for more than an hour much less give you +rep. It's no big deal. The HF News isn't about being a credit-whore, but just spreading the news.

Reputation gain is exactly what I think this is about. I wasn't sure if I was the only one.

Zeon - January 20, 2011, 9:13 am

I'm not annoyed at the fact that I don't get credit, I'm annoyed at the fact that EctoPlasm claims my work as his. Wouldn't you be annoyed if you spent 3 hours writing something and a random guy took your work and claimed it as his own?

Alright guys Im back. First lets start off with number one. Zeon dont think your smart, you tried telling me to fuck over everyone on HF News so you can do it all. Second of all, you ASKED if you can do it all. Do me a favour and ctrl +f your name on front page. Tell me if you cant find it.

Third of all, the only two people I truly apologize is to .Luke (Thanks the banner looks sexy, and Shadowrym, for helpin out too. THIS week news was done by basically everyone. RL helped as well. Zeon, I dont need you if you think I did, you thought wrong. Ive EASILY managed HF news myself many times, but It would give a better image if HF did it together, so RL is operating OUR HF news, and staff on their decision move it.

Go make your own shit Zeon, and dont cry to me. (Jan 20, 2011 10:18 AM)Mark Webber Wrote: [\[CITE\]](#) Ok Zeon. I've been kicked off the Crew without even being told, which is annoying. I'm moving on. You should too, you cannot do anything more about it.

Firstly, I got denied for the RF, so I can't help, which is a letdown.

Second of all, Zeon sent me a message saying we were Temporarily removed, because you and him wete going to try something new. We would be doing yhe News next week. As long as I get a right to speak, I can say i'm not happy with either of you. I dont like Backstabbers.

EctoPlasm made me send those PMs. He got me to do the dirty work.

I love it how you lie. Lets show a quote from you to me shall we?

EctoPlasm Wrote:Like I said, just get what ever section you can. I need to see how this can be planned as I dont know If i can fuck 15 people over (HF News crew). I might just plan everyone doing their own part, so they feel happy.Zeon Wrote:To succeed in life you have to fuck people over. I'll do all the news if you don't want to. Hell, I'll even right an apology letter and send it to all the ex

members if you want me to.

Talk to Omniscient as much as you want. I really do not care, you also should have taken this whole thing off this thread as thats not what HF news is about. You make your own thing, It doesnt bother me. I dont want you in my team anymore and its now RL that will take care of this.

Zeon - January 21, 2011, 3:13 pm

Lol, implying that you're the leader of the team?

Do you see me as the moderator? Nope, I started my own shit, and developed it from there. Your just mad that you didnt post the thread. I gave you credits and you came to me whining that you wanted to do all of it. Stop with the unnecessary drama and being immature.

It's funny how that last part is an image. Sorry about not getting the white hat news header, I've been really inactive recently. It' finals week and I've got competitions almost every other day.

The Red Lions are doing the news one? Great, we get to see spelling and grammatical errors every week now! :D

Alexander - January 31, 2011, 1:55 pm

I can't help hating Red Lions for some reason. I think it's because of their members attitude.
