Thread: [\[Release\]Free Caller\[Release\] make free calls](#)

FOUNDER - January 19, 2011, 10:31 pm

Hey HF

Few Days Back i was going through a project which i did long time ago ..
and i decompiled my caller , and made some changes to it which let's you make free calls
anywhere in the world for free ...
before i release that caller.
i am releasing the demo caller
which let's you make 15 seconds of free call anywhere in the world at once ..
though you can't make more than 4 calls a day from the same ip.
But in the full version you can make free calls anywhere in the world for as much time as you want
..
But i will wait for the reviews here before i launch the full version..
or shall the full version be paid ..
as i have spent a hell lot of time in decompiling the SFW dialler in my application just to bypass the
security barrier.

feedback appreciated

[Download FreeCaller](#)

[Virus Scan Report](#)

Special thanks to people at HF Coding ! ???

oops a screenshot

[img]<http://img109.imageshack.us/img109/8238/freecaller.jpg>[img]

hlidar - January 19, 2011, 10:39 pm

thanks very cool

i will download it now for test XD

GoldenPhe0nix - January 19, 2011, 10:49 pm

Anyone tested this and did it work ?

FOUNDER - January 19, 2011, 11:01 pm

(Jan 19, 2011 11:49 PM)Cooljc™ Wrote: [\[CITE\]](#) Anyone tested this and did it work ?
you can test it yourself, trust me you'd love it ..

devnull - January 19, 2011, 11:24 pm

Theres not even a .exe only a setup.exe which Also Comes With Application Files ect. i dont get it,
Cant you just Make the .EXE itself or what? when i install it wont let me click again

Alpha.Stallion997 - January 19, 2011, 11:26 pm

Isn't that texture/theme of your screenshot from evaphone?
Sounds infected to me! Don't download this without scanning guys!

-mothered- - January 20, 2011, 2:45 am

Now rather than scanning the archive, please provide a scan report of the executable.

I shall await.
Thanks.

crackmind - January 20, 2011, 3:01 am

better u all use <http://www.evaphone.com> its link bese

F0UNDER - January 20, 2011, 3:31 am

(Jan 20, 2011 04:01 AM)crackmind Wrote: [\[CITE\]](#) better u all use <http://www.evaphone.com> its link bese

i know the dialler is from evaphone ..
that's what i have mentioned
the thing is if you decompile their dialler (the .swf file)
and then their are bits in the coding which can let you bypass the 15 seconds barrier
and which is included in full version..
if you don't believe me try decompiling yourself..
no offence .. and yeah i'll upload the exe too ..
don't worry ..

Mac Mill?r - January 20, 2011, 3:36 am

ill try the demo and if like it can i get the full version?

F0UNDER - January 20, 2011, 3:58 am

yeah sure,
but i aint sure if it'd be free .
and yeah i am still adding more features to it like proxy support..
and yeah the full version crashes at times because of few programming errors..
i am working on that with few HF coders..
it should be out within 72 Hrs..

Fear is 1337 - January 20, 2011, 6:58 am

So do the calls originate from our ips?

F0UNDER - January 20, 2011, 8:44 am

Actually they do ..
and the company which provide this service logs the ip's too ..
but the demo itself has 10 inbuilt proxy support ..
though i have gather up a whole lot of proxies to work in random order for the full version ..
i tried to eliminate their code which logs user ip ..
but then it causes debugging errors ..
so i am still working on that part, till then let's just manage with the proxies ?

alibahadur - January 20, 2011, 12:28 pm

it sucks bcz tht site didnt wrk in pakistan....

F0UNDER - January 20, 2011, 12:43 pm

The Key is to stay patient and wait till the bell starts ringing ..

slambergamer - January 20, 2011, 12:48 pm

can call but cant even talk... anyways to fix this?

LeN - January 20, 2011, 1:08 pm

Well why would they pay you for a "full version" that is not even confirmed to get us free calls indefinitely? Chances are it'd be better to just pay (Or use Google Voice and pay hence it's extremely better) than buy your program which supposedly "bypasses" this file of theres which would probably be patched.

Well, just take a look. There're a shitload of better coders here and wouldn't they work on this first if it was possibly? Your account looks spamming, especially when your name is advertising a site.

RuleBreaker - January 20, 2011, 1:48 pm

i always get this error for my country

<http://snpr.cm/9L3>

FOUNDER - January 20, 2011, 2:06 pm

Well, just take a look. There're a shitload of better coders here and wouldn't they work on this first if it was possibly? Your account looks spamming, especially when your name is advertising a site.i never mentioned that i'm sure about selling it.

no offence but i did asked people if i should sell it or make it available for free ..

and i know there are many better coders than me over here, and those are the only people from whom i have learnt whatever i know today ..

and hopefully would continue learning too ..

and it's HF coders only who are helping me with fixing all the bugs in the Full version ..

don't go that hard at me just because i aint got reps as good as you my signature aims at reaching the same goal..

and well about the domain you think i'm advertising

well i used to own it while i created this account.

that website doesnt even exist now ..

Thanks anyways for investing your time to post in my thread ..

??

and feedback is what i look for be it in the form of criticism ..

so if you think that the full version should be free and if the other's too think the same then it shall be free ???

(Jan 20, 2011 02:48 PM)RuleBreaker Wrote: [\[CITE\]](#) i always get this error for my country

<http://snpr.cm/9L3>

which country do you live in .. ?

i'd be more than happy to help ya make free calls...

DerHeXxXer - January 20, 2011, 2:43 pm

dude this thing dont work -.- and it installs itself in the microsoft start meneu folder ô.O?
sorry for ma bad english

it works for most of the people ..
you got latest .NET framework ?
?

4fun - January 21, 2011, 6:25 am

@www.thepiratecrib.in

hi sir, i hope ur APP would b free sir so that everybody happy ^_^ and thanx 4 the tools sir that u made.. more power 2 u sir.. and sir can u pls add a SMS/CALL SPOOFER? and thanx in advance..

hack_addicted.pt - January 21, 2011, 7:43 am

It didn't worked for Portugal, not cellphone neither normal phone.

Infinity. - January 21, 2011, 8:07 am

cool and its damn awesome thanks for decompilation

danidm - January 21, 2011, 9:13 am

Its a old post. i checked

ice_qb - January 21, 2011, 10:14 am

if you can coding to make up 15 minutes it's verry cool ... but for mobile phone doesn't work (i'm from romainian) just fix telephone... i waiting "full version" but if it's necessary pay... sucks :D

retaer - January 21, 2011, 10:53 am

It's infected.

Run on sandbox.

It runned few processes and ended them..then again one process and another one named SandCrypto.exe or something like that it was..

And my pc freezed.

DAFI247 - January 21, 2011, 11:14 am

He is a noob .He don't even know how to build the exe with Visual Basic he just published it to a setup.exe And i remember seeing this shit caller on the net it's a damn website . try to go to evaphone.com .

RuleBreaker - January 21, 2011, 12:29 pm

i`m from montenegro...can i use it?
and how XD

FOUNDER - January 21, 2011, 10:25 pm

for all who think it's a malware ..

well i might be a noob ..

though your own Rep telss what rocket scientists you are ..

nevermind feedback is appreciated in any way ..

and yeah i'm about to finish the full version just one bug left , because of which you need to restart application everytime after you end your call ..

so you can expect the full version soon ..

you got latest framework installed ? (Jan 22, 2011 03:59 AM)munnaabhaiu Wrote: [\[CITE\]](#) i am trying its working but only giving me 5 sec.

just wait for sometime full version will be out soon ..

kotssnor - January 21, 2012, 1:58 pm

I can't see flash inside the screen:) I've got .NET installed and Flash

obhishap - May 25, 2012, 3:37 pm

installed but getting a blank window. no dialer help needed plz.

AMMO - May 25, 2012, 3:50 pm

never seen anything like it. Nice program and good work

Tommy Chong - May 25, 2012, 5:00 pm

This one is always free..

<http://www.icall.com/>

You can make unlimited calls to any country.

South_Park - May 25, 2012, 7:43 pm

nice, i love this, get release, thanks!

Wilmer - May 25, 2012, 8:26 pm

thanks for the thread bro, good job :D
