So this booter is simply not working. He's selling to mass of people a "booter".

I'll chargeback the payment right now.

Here the video proof:

Punctu?re???????????????? - January 20, 2011, 10:01 am

Wiz owes the actual owner of Maniac Booter ~300 Dollars. Once Wiz gives Maniac the money, then he can buy shells. At this point, wiz still owes the money. So I'd say Wiz is scamming.

Joe67 - January 20, 2011, 10:56 am

I'm a customer too , and i have the same idea about this booter ! He scam a lot and a lot of people :(

Le Mieux - January 20, 2011, 11:00 am

I've already chargebacked on this payment. I bought the booter and when I got it. It was WEAK wouldn't take down connections on Xbox live.

Rainmaker - January 20, 2011, 11:05 am

Isn't this the same guy who denied hosting his booter on a SPAM.com host? Figured this was coming.

shane - January 20, 2011, 11:28 am

ye big scam wont refund me either

Hot Chocolate - January 20, 2011, 11:41 am

Vouch for this scam report. WIZCRAFT is a known asshole and doesn't care about his customers. He has terrible customer support and it's not surprising this happened. He falsely accused me of Credit Card fraud because I called him an asshole and -3'd him.

Full of bullshit. @WIZCRAFT, it's time to be disgraced.

fads23 - January 20, 2011, 2:25 pm

Lol it's clearly fake. No way that a command can be sent to 1k shells that quickly, unless it's a super hardcore server running at least 10 cores.

Milkyway - January 20, 2011, 2:33 pm

What do you expect? the booters \$4.75, buy a good booter WITH a good source.

zanx952 - January 20, 2011, 5:56 pm

Payed for this crap and he said it was 100% working..

KACTA - January 20, 2011, 5:59 pm

Lol why do you kids keep buying these cheap booters, theyre garbage.

KACTA - January 20, 2011, 6:54 pm

Sorry, would you like me to edit my post and place a question mark at the end? I could do it if it bothers you so deeply.

I lol'd so hard at how you think it was only just a question mark.

KroN1K - January 20, 2011, 7:42 pm

This feels like another Sk1D Booter moment :)

n0tReanimation - January 20, 2011, 7:48 pm

Maniac Booter will be down in courtesy of this scam report.

Capo - January 21, 2011, 4:57 am

Yeah, I sent this guy a pm for a refund. If I don't get it i'm charging back as well. Definetly looks like a scam.

DONKEY_ONLINE - January 21, 2011, 6:47 am

This is not a scam because he gave you the product as promised but it's pretty obvious he is using public shells because it only takes like 10 regular bots to down warez-bb. Not surprised with another new booter in the market... it dies faster then a fake battery.

The Miz - January 21, 2011, 7:16 am

Yeah I paid like 1 hour ago and hes ignoring PMS

You really should have checked the scam reports before you bought it.

I personally check the scam reports section on any member no matter how much rep/posts the have just to be safe.

4th Dimension - January 21, 2011, 8:07 am

When I bought it there was no scam report.

That's so funny. I have made a booter for myself with 15 public shells and it can hit warez-bb.org. Seriously.

And in hes thread he says it hit virustotal.com, it is 100% working, etc shits like that so this is a SCAM.

Btw, stop saying that cheap booters are shitty, I've bought another one with 1k shells with near the same price and it hits hard.

BuyOMC - January 21, 2011, 10:17 am

Thats why you NEVER buy a WEB BOOTER

WaKa - January 21, 2011, 10:25 am

Ya I bought this too, wanted a refund the guy ignores everyone. I hope he gets ban.

You will be surprised in most cases that booter will be mixed with tons of public shells if not all.. just to mislead people in to getting a sale with a high number.

Markdapimp - January 21, 2011, 5:50 pm

this is why you dont buy a new booter that opens up
they might close early
:[:

iQute - January 21, 2011, 5:51 pm

im going to buy yours mark

zanx952 - January 21, 2011, 6:34 pm

People that say " You bought a logg in account" Are stupid read his thread it says it can take down gameing servers wich it cant, i hosted a 100% unprotected server and it couldn't take it down..

Viral Impact - January 22, 2011, 4:54 pm

i bought from this guy im gonna charge back now

4th Dimension - January 23, 2011, 3:01 am

LOL and now I'm getting -repped from WIZCRAFT because I opened a "FAKE scam report", the only FAKE thing here is this booter. Fortunately he's banned now :)

Kick Buttowski - January 23, 2011, 3:05 am

People you cant refund coz you paid via plimus .Its hard to refund

shane - January 23, 2011, 5:28 am

Gooples - January 23, 2011, 9:18 pm
