This is Lesson One, the first lesson in the Graphics Bootcamp series. If you haven't seen the Original Thread, check it out [here](#). Simply click the image to download the lesson pack, enjoy!

There will be more of these to come, so stay tuned into the Graphics Tutorials section! It's also recommended to view my Text tutorial, if you haven't already. You can view that [here](#)

Good luck everyone. If you have any questions, feel free to post here! I'll be happy to answer any questions you may have. I'd also like to see what you guys come up with, feel free to post your creations here!

Also Note: This tutorial assumes that you are familiar with the layout of Photoshop. I'll be releasing a Prologue later this week or next, which will teach someone brand new to the interface where everything is.

Thanks .Luke :).

This one seems like more of a standard signature tutorial, but the goal is to have one at the beginning, and end of the class to assess your improvement.

I tried to cram as much of the basics and tactics in there as I could.

Thermal™ - January 20, 2011, 5:18 pm

This will turn out to be a great learning session for members here since you are very good at writing tutorials for your great tags.

Keep up the great work, along with the great tutorials. I hope to see more, and I hope to see some of the low skilled members improve because if you.

This is great man. Thanks!

Nihilicity - January 20, 2011, 7:55 pm

Doesnt photoshop cost money? Where can I get it free?

SavageBoys - January 20, 2011, 9:00 pm

Good job on this Rhythm, easy to follow, newbie friendly, and goes into some of the more useful techniques in graphics.

Clipping masks are a great way to add a stylish effect as well as successfully blend in edges without smudging/erasing.

Actually demonstrated in my current sig ^_^

Bad text, but overall a pretty good sig for beginners.

I'm thinking about joining the HF gfx community.

I tend to stay towards the hacking and coding parts of the forum, but I might get into this again.

Dark PaiN - January 30, 2011, 5:55 pm

Good tutorial man. Worked for me.

Only if you want to :).

A slight change in my original plans, I may not be making as many of these as I previously thought.

Hypnosis - February 12, 2011, 5:19 am

I am going to use this in my next signature. Thank you Rhythm for making graphics boot camp!

Times Change - February 19, 2011, 7:35 am

All I can say is that when I first opened this thread, I doubted that I was going to even be able to do any of the steps. Turns out that this is a great, easy and simple tutorial to follow and learn more about graphics, I will certainly completing each tutorial and will post various different outcomes.

Thanks

Here is my outcome by the way, my first Photoshop signature. I know it's bad, but for my first signature I feel like I've learnt a ton.

sid8012 - March 3, 2011, 9:39 am

When are you making more tutorials? You know we love these tuts!

Rhythm - March 3, 2011, 12:46 pm

I'm sorry everyone, but until further notice I cannot continue to release these.

Maybe after this semester (over the summer) I may get back into it, but it depends on a multitude of factors.

Exploit - *March 10, 2011, 6:19 pm*

Nice Rhyth. Haha. This will come in handy. ?

Emulator - *March 11, 2011, 3:43 pm*

Nice tutorial thanks for putting the effort in to making one.

JailMaster - *March 12, 2011, 1:10 pm*

Dude, this is amazingly useful. Most complete and understandably tutorial online imo!

I also like the way you make it so you can use the Windows 7 auto window re-size to use Photoshop at the same time than Mozilla!

Chakalaka - *March 14, 2011, 7:29 am*

I like all Rhythm tutorials it is awesome thank you dude.
