Thread: [\[RELEASE\]Facebook Like Creator\[RELEASE\]](#)

eXero - January 21, 2011, 12:59 pm

Facebook Like Creator by eXero and Cody8295.

Me and Cody designed this Facebook Like Creator not really to spam, but it is possible to spam, but to help spread links. It does work, but you may get IP banned from the site if you do it too much. This creates what is in the textbox as a like and can go viral on facebook. It can go faster than a human, so it is useful. Please post a reply. It takes 15 seconds.

Download(help me out please):Code <http://www.#/file/SuT3ucDMirror:Code>
<http://uploading.com/files/2m91d48e/LikeCreator.zip/>

LoL? really does it work?

in that case :D awesome

eXero - January 21, 2011, 1:08 pm

It does work. Ask Cody we tested it.

iRtehLeet™ - January 21, 2011, 1:08 pm

This is pretty much just a GUI to something you could essentially do in your browser.

Makes life easier I guess. ?

?Border?ineExtr(A) - January 21, 2011, 1:08 pm

Can you describe the features more in-depth please? I didn't understand what you meant.

eXero - January 21, 2011, 1:09 pm

Actually iRtehLeet™ this does it faster.

iRtehLeet™ - January 21, 2011, 1:09 pm

This could be used for more then just creating facebook like pages by the way! Implement things like automatic proxy switchers and what not and your set! ?

eXero - January 21, 2011, 1:15 pm

I know. We just didn't in this version.

BluntManKoD - January 21, 2011, 1:18 pm

So wait can someone explain this a little more?

TraptCode - January 21, 2011, 1:19 pm

It would be hard to set the proxy in a web browser. That would involve editing the registry.

iRtehLeet™ - January 21, 2011, 1:19 pm

(Jan 21, 2011 02:19 PM)TraptCode Wrote: [\[CITE\]](#) It would be hard to set the proxy in a web browser.
That would involve editing the registry.
Implementing a proxy in a VB.net web browser control isn't very hard at all, many examples around.

TraptCode - January 21, 2011, 1:21 pm

Well like I said, that would involve editing the registry. Most people would be cautious seeing the UAC prompt(If they have it enabled)

Fraction - January 21, 2011, 1:24 pm

That looks awesome.
I'll have to come back and try this.
Good luck.

x1029 - January 21, 2011, 1:36 pm

I hope you put a standard deviation of error on the time delay...

E.G. User types 15 it does from 14.392853 ~ 15.938252

Azido - January 21, 2011, 1:39 pm

Thanks mate,

I will try to download it. It's hard cuz of shitcash ;)

DeathStar™ - January 21, 2011, 2:23 pm

(Jan 21, 2011 02:19 PM)TraptCode Wrote: [\[CITE\]](#) It would be hard to set the proxy in a web browser. That would involve editing the registry.

Not really. Here is an example that DOES NOT edit the registry.

<https://hackforums.net/showthread.php?tid=289552>

Setting proxies isn't hard at all using webrowsers.

Thanks ?

Cody8295 - January 21, 2011, 2:26 pm

For everyone asking for elaboration... This basically creates those pages on facebook that say like; "Jon Q likes Going to the movies on likeus.net." But you can create them at a rapid rate using the timer interval. Try it out.

Sia - January 21, 2011, 2:59 pm

Let me get this straight, you need to view the pages source to get the button and textbox ID and then to put it into the application THEN to "do" all the stuff, instead you could simply do it without the program and save a lot of time?.

eXero - January 21, 2011, 3:03 pm

Once you know the IDs of the site, you can create them at rapid speed.

efun - May 30, 2011, 4:07 am

I do not understand what is it for..

eXero - May 30, 2011, 8:45 am

This is so that you can create likes on a facebook like site automatically.

kraggz - May 30, 2011, 10:25 am

first download link does not work and second download link removed! :(please re-upload.

eXero - May 30, 2011, 11:05 am

I updated both links. Please post a reply if you downloaded guys!

kraggz - May 31, 2011, 12:55 am

Downloaded! Thanks , really useful thing.

eXero - May 31, 2011, 6:55 am

Your welcome kraggz. I appreciate your reply.
