AUTISMUS MAXIMUS - January 22, 2011, 11:01 am

Created By me

What you'll need

proxpn

no-ip account

and a rat.

Video = 15 min.

Say thanks

SD8Z - January 22, 2011, 11:06 am

Wow, I never thought that you could RAT without port forwarding.

Well, I have mine and it works.

But thanks anyway.

cOld fus1on - January 22, 2011, 11:09 am

Nice share bro., should help some noobs out....

AUTISMUS MAXIMUS - January 22, 2011, 12:58 pm

I had this error like 3 months ago.

Try downloading the newest version of darkcomet.

Also try downloading another rat like cybergate or spynet

If you want to use a rat WITH port forward
check this website

trojanteam.blogspot.com

it also has a huge list with rats

ClamMasterK - June 5, 2011, 1:01 pm

Nice Tut. It's really helpful since I can't seem to port forward correctly.

3lit3_bison - June 5, 2011, 4:21 pm

thanks! i appreciate it

video works fine here!

pro22 - June 6, 2011, 2:48 am

Tried with cybergate didnt work :s ... i might be doing sommin wrong.

Grey Mind - June 18, 2011, 3:38 am

Grey Mind - July 18, 2011, 9:56 am

Nice tutorial thank you! I like that way.

VictorMLP - July 18, 2011, 11:53 am

Would you recommend, Darkcomet or Spy-net ?

Thanks.

Killer1478 - July 18, 2011, 11:55 am

Thanks for the guide. It helped me alot!

i cant keep my slaves :(i ge tinternet through pdanet tethering and everytime i connect proxpn its a different ip so i lose my slaves :(on a brighter note ive had 3/4 by accident come up :)

agentmax69 - July 26, 2011, 11:45 pm

OMG mate.. for the first time almost 1 year now I just setup my first RAT reading this tutorial..
this is so helpful for me.. thank you so muchh mate ...

AliKasra2 - July 27, 2011, 5:27 am

I love the song thank you ;)

Abided - July 27, 2011, 9:02 pm

this works for me i cant acess my router so i used this and it opened my port 1604 all I have to do is get it crypted then spread it

-JFK - August 4, 2011, 7:53 am

this is the most retarded way to do it buy its genius :P

Furuta - August 4, 2011, 8:02 am

Nice share dude thanks you

spartaniac - August 4, 2011, 11:07 am

You need to send you server to get slaves?

Romanov - August 7, 2011, 5:43 pm

Tnx for that m8, it's really awesome!!!?

stylooo__ - August 16, 2011, 5:34 am

Nice tut, but I lose my victims in 2 days, can it be true that the reason is that I use ProXPN?

mitch00 - August 16, 2011, 5:58 am

ProXPN works fine, No-IP works fine, DarkComet works fine, yet Canyouseeme disagrees that the port is open for incoming connections -- any ideas?

Robb - August 16, 2011, 11:19 am

How can i get proXPN for free? everytime i go to the site and try to make an account it takes me to the billing page.

yrensar - August 17, 2011, 12:14 am

I have a modem called Thomson TCM420 and I dunno how to portforward... Does Proxpn open ports for me? Or I need still find Default Gateway in cmd > ipconfig and then type it to my browser. This does not work, because it finds nothing.

And last question, which RAT is better - CyberGate / DarkComet ?
?

madman2 - August 17, 2011, 5:53 am

Doesnt proXPN keep logs, I remember looking around and seeing that they do.
However, I am not sure.

If you don't want it running slow you have to pay for it.

agentmax69 - May 30, 2012, 9:08 pm

Too bad it doesn't work anymore :(?
is there any way without port forwarding ?

« ?inja » - May 30, 2012, 9:09 pm

yeah, use nvpn service (they allow port forwarding from their servers to you) and download OpenVPN to connect to it

link to nvpn: <http://nvpn.net/>

MyLittlePony - May 30, 2012, 9:31 pm

So i'll be able to use my RAT with a vpn?

Didn't think that was really possible!

Thanks, always had a few problems with my ISP and router, this should fix it.

morgendexter - May 31, 2012, 8:33 am

Yes its posible you just have to go to No-ip.com

and chang the ip adress to ypn ip adress .

BlockDriller - May 31, 2012, 9:27 am

Could be very helpful but ProXPN is a very slow Internet Proxy (For me anyway) so hopefully this helps out some newbie's to ratting.

niks143 - August 28, 2013, 12:10 am

Guys....I have two main problem regarding creating stub and portforwarding..First when i click 'build stub' after doing all neccessary things, i get a error message showing 'Generation aborted by user'..what should i do to fix it? Plz help me and i need help in portforwarding...When i copy and write the default gateway in the URL box i get 'webpage is not available'....What should i do?? I have an IDEA 3G netsetter dongle...therefore should i need to portforward it to use darkcomet?? You can reply,PM me or send an email to -woozworldlost@gmail.com.

Please reply quick...!(Request)....Thnx..

THDG - August 28, 2013, 12:15 am

Thnx a lot !, it really helped me! I made it :D

Not everyone has a good router to port forward , like mine for example a technichcolour .

Crashed - January 22, 2014, 2:53 am

Will this work with [censored] instead of ProXPN?
