Thread: [ForcedHacking Crypter - Modded by Pyratepig](#)

.Astro - January 22, 2011, 2:52 pm

Download link has been deleted thanks to (Jan 31, 2011 04:00 PM)dr-genix Wrote: [\[CITE\]](#) hahahaa :d pass is : Modded by Pyratepig.

I will no longer be releasing the FUD version publicly.~

So I decided to just mod some source. I chose the ForcedHacking Crypter source to do so. It's not FUD, but it does crypt it a bit. You can always try to change the assembly, icon, pump the file, and such. But that's all up to you. I'm not sure if it works on RAT's and such, but it might so you can test it out if you would like.

While I was modding the source, accidentally added some useless crap that I meant to set it Visible = False, but forgot. So you'll have to deal with that extra button.

BlueMask - January 22, 2011, 3:04 pm

DUDE IT WORK FINALY.

A CRYPT THAT WORK :D TY.

.Astro - January 22, 2011, 3:09 pm

Glad you liked it. I'll be modding more sources, releasing them until I can actually build my own crypter, so stay tuned.

BlueMask - January 22, 2011, 3:10 pm

first it was detected 16-16

now is it 3-16 :D SO AWESOME
dude you are THE MOST AWESOME MAN in the world.

.Astro - January 22, 2011, 3:12 pm

.. I guess. It's only a simple modded source O.o;

neraniggy - January 22, 2011, 3:13 pm

does this support EOF?

In other words does it work with RAT servers? for ex. CyberGate?

Thank you

BlueMask - January 22, 2011, 3:13 pm

it is poison ivy.

have use it for so long so.

.Astro - January 22, 2011, 3:14 pm

Yeah it has EOF so it should be able to work with RAT's.

BlueMask - January 22, 2011, 3:15 pm

Ok nice :P but ty mate :D

befor:

<http://vscan.novirusthanks.org/analysis/24a48d34a594a5956c5d4c4d9c94f349/dmlydXMtZXhl/>

after:

<http://vscan.novirusthanks.org/analysis/9168044f54c8747ee429d70b3cbc009b/dmlydXMtZXhl/>

.Astro - January 22, 2011, 3:16 pm

Your welcome, glad this was helpful to you.

neraniggy - January 22, 2011, 3:16 pm

(Jan 22, 2011 04:14 PM)pyratepig Wrote: [CITE](#) Yeah it has EOF so it should be able to work with RAT's.

Awesome,

whats the password tou?

im a big noob ;)

.Astro - January 22, 2011, 3:17 pm

Lol, you aren't going to get the password from that. There's a reason why I protected it with a password for a reason. So I wouldn't have to keep updating it.

BlueMask - January 22, 2011, 3:21 pm

but dude the pass was to easy :P

.Astro - January 22, 2011, 3:23 pm

So far, it's blocking about 5 noobs from getting it lol.

5 PM's so far for the password. The more you ask the harder the next password will be for my next release.

Linyah - January 22, 2011, 3:26 pm

Doesn't work for me. When I run the crypted server sandboxed, it just close.. Any option?

BlueMask - January 22, 2011, 3:26 pm

ok nice then sell the pass for like half dollar or shomething like that :P for noobs that cant get it.

NiKKE - January 22, 2011, 3:49 pm

Thanks for this , nice share mate! Does it work with DarkComet? Does it need Framework? if so, what framework.

Sockatobi - January 22, 2011, 3:51 pm

This is awesome. Thanks. This is amazing for a free one xD

Apex. - January 22, 2011, 3:55 pm

This is Bull
dosnt Crypt my sever
it was 16/16 now its 14/16
WOW NICE

valkon4 - January 22, 2011, 3:56 pm

Dear Good member,

can you send me the password to download the file.

thanks , best Regards, valkon

Fuego - January 22, 2011, 4:04 pm

I don't get it..I have the password, but do i enter it on the download page? Cause when i do it says wrong password.

Indigent - January 22, 2011, 4:08 pm

Doesn't work for Cybergate

Solowestside - January 22, 2011, 4:08 pm

where did you find the source?

tristan6100 - January 22, 2011, 4:47 pm

Use and md5 hash next time as password, it's harder to find.

.Astro - January 22, 2011, 7:42 pm

/Sigh.

I'm guessing this was raped til it became worst than 3/16 now ..

[ZERO] - January 22, 2011, 7:52 pm

Supporting you on this one pyratepig, keep doing stuff like this. ;)

.Astro - January 22, 2011, 7:53 pm

Trying to think of ways to make it FUD. Any suggestions?
And thanks for the support.~

jackisinbed - January 22, 2011, 7:54 pm

Just do it, you can do it, you have tha powaa

Houston - January 22, 2011, 7:55 pm

whats the password for the download?

[ZERO] - January 22, 2011, 7:56 pm

Well Beelinject comes from a non-FUD RunPE used inside of the Stub.

I recommend making/modding/finding a new RunPE and your detections should go away.

Btw, what does this crypter use to write the data into the stub? EOF, CodeDOM, Resources?

.Astro - January 22, 2011, 8:00 pm

Ah. That explains it.

And EOF. EOF was already "built - in" to the crypter while I was modding the source. Like I didn't add it. I added a bit of junk code not sure if that would help, was mostly looking over the code to review it and how it was made. I also changed the encryption method and changed names like "Stub" to random characters like "skdiwZlkfjghtSldjfjer"

[ZERO] - January 22, 2011, 8:02 pm

(Jan 22, 2011 09:00 PM)pyratepig Wrote: [\[CITE\]](#) Ah. That explains it.

I also changed the encryption method and changed names like "Stub" to random characters like "skdiwZlkfjghtSldjfjer"

Well first you need to take a big step back, and change from EOF to Death API Resources, or CodeDOM, so you can bypass Avira. As for the Beelinject ones, simply get a new RunPE.

.Astro - January 22, 2011, 8:24 pm

Would it be fine to use EOF + CodeDom or just make a bigger detection?

Started looking for a new RunPE method.

Thanks for helping me.~

[ZERO] - January 22, 2011, 8:38 pm

Avoid using EOF, i don't have EOF supported in my Crypter, and almost all RATs work just fine.

Yeah, find a RunPE, and go CodeDOM.

.Astro - January 22, 2011, 8:49 pm

Alright. Thanks for the help. I'll see what I can do to make this FUD.

T3eS 2 - January 22, 2011, 9:03 pm

Thanks mate. Nice job.Anyway helpful for me

.Astro - January 22, 2011, 9:13 pm

Meh, replaced thew RunPE with another I found. Gave it an extra detection :l.

Okay, this is just getting annoying. I deleted the EOF method, and the detection from Avira still didn't go away :x.

c0nfused - January 22, 2011, 10:28 pm

Why do the passwords never work?

HckF - January 22, 2011, 10:40 pm

Pass wont work :S

(too short)

.Astro - January 22, 2011, 10:52 pm

Funny, it was already downloaded 10 times. What password did you get

c0nfused - January 22, 2011, 10:58 pm

Well i am new to crypting.

TOO SHORT.

HckF - January 22, 2011, 11:08 pm

Its prob just me, but where r the passes? Am I blindly missing them lol

.Astro - January 22, 2011, 11:16 pm

You decrypt them ..

You decrypt them then you will get the actual password.

valkon4 - January 22, 2011, 11:21 pm

I posted here I know I am new but is it not possible for a guy like me to get the pass pls ? someone sent me a pm he wants \$1 for the pass wtf ?

.Astro - January 22, 2011, 11:33 pm

Someone's giving the pass out? Fuck these damn leechers. I'm close to adding a licensing system in there now.

dreamer00 - January 22, 2011, 11:43 pm

nice m8... u done a good job :)

c0nfused - January 22, 2011, 11:45 pm

well sry for the many double posts xD

valkon4 - January 22, 2011, 11:47 pm

guys this forum tread new members so bad wtf

.Astro - January 23, 2011, 12:10 am

Well all I know is that I need to do a stronger encryption for the password if I'm going to be releasing the FUD version. And it's not FUD yet, just saying I'll need a better password.

nazeblaze - January 23, 2011, 12:25 am

hey @pyratepig whats the password?

id appreciate it thnx..

.Astro - January 23, 2011, 12:30 am

Figure it out yourself. if you can't, you don't deserve the crypter.

Ethereal - January 23, 2011, 12:32 am

Nice share, bro.

Get working on your own - make a private one, and then release a second public one.

c0nfused - January 23, 2011, 12:47 am

Base 64 2x i dont get it wait decrypt 2x?

EDIT#

Few took fire years at looking at tuts on how 2 decrypt but i got it i am going 2 test it out.

tklein42 - January 23, 2011, 12:52 am

Hey bro. Didn't download but I just wanted to say good work and good luck on the upcoming projects!

Your work here is appreciated. Shame on leechers!

.Astro - January 23, 2011, 12:53 am

(Jan 23, 2011 01:32 AM)Ethereal Wrote: [\[CITE\]](#) Nice share, bro.

Get working on your own - make a private one, and then release a second public one. I was working on my own, but the output file came out as the stub.

I realized I added the stub to the project, I didn't make a new one. So I'm currently working on that as well as FUD'ing this crypter so I understand it better.

Ethereal - January 23, 2011, 1:04 am

.Astro - January 23, 2011, 12:45 pm

(Jan 23, 2011 08:54 AM)Right Gf Wrote: ([CITE](#)) Are you pyratpig from FJ/d0x just wondering :p
Yes I am.

--

1337 5P34k is Troll speaking. Replacing letters with number ..?

Example - lol u so cool

--

You have to decrypt the password, not just copy and paste the encrypted one to open the download

--

Quit scanning on VirusTotal, or I'll make it so it'll be harder to get the next version.

DuctTape - January 23, 2011, 12:46 pm

Does this work with Blackshades?

.Astro - January 23, 2011, 12:48 pm

Not sure. I didn't test it with any RAT's. Just a keylogger server.

Someone said it worked with Poison Ivy I think, but I'm not sure.

I doubt it'll work with BlackShades though.

jeejeepower - January 23, 2011, 1:03 pm

Not fud but thanks for the share, and yes its work with rat, you just need to add the good settings.

Just tested with DarkCOMet

Lame Encrypt way...Lol'd L33t Sp3ak!HAHA

So you would rather have like 1 FUD crypter, and no other crypter? Just because some detections pop up, you never know if the victim has a different AV that didn't detect it.

Also, people think the 1337 5p34k is the password. Pretty stupid at some people who do. Can't read an damn encryption I guess. :l.

xCash - January 24, 2011, 6:51 pm

I have replaced the numbers by letters, didn't help, so how can i decrypt by

1337 5p34k?

Modded_by_Pyrchespig ? Is this correct? And why not?

Finally I decrypted the pass, use this site for it :

<http://www.yellowpipe.com/yis/tools/encrypter/index.php>

Rahul_Rulz - January 27, 2011, 12:51 am

Thank You :), Clean & Simple Crypter
Worked For Me.

But My Server Detected 04/16

ashio83 - January 27, 2011, 1:07 am

Cheers for this Ace, great job. Do you know if this will work with Rapzo Logger 1.5 public, Without corrupting it?

Pinduur - January 27, 2011, 6:23 am

Corrupted the CyberGate, DarkComet and SpyNet ?

Kaosvf - January 27, 2011, 6:32 am

thank you, nice crypter
@@

Dunkthefunk - January 27, 2011, 6:40 am

It works fine! Read up on guides and stuff. Don't be lazy :)!

Thanks very much Ac€

.Astro - January 27, 2011, 7:10 am

The more PM and asking for how to decrypt messages and posts I get the more I'm not releasing the FUD version.

Jonah196 - January 27, 2011, 7:55 am

Awesome crypter! , got my virus detect from, 39/42 down to 6/43. Thank you :)

Right Gf - January 27, 2011, 8:45 am

(Jan 27, 2011 08:55 AM)Jonah196 Wrote: [\[CITE\]](#) Awesome crypter! , got my virus detect from, 39/42 down to 6/43. Thank you :)

Way to scan on VirusTotal, fucking idiot.
Also, the crypter corrupted my CG server.

Reaper_ - January 27, 2011, 3:48 pm

yes i decrypted the leet speak, pass still dsnt work

SiR BackPacK - January 27, 2011, 4:03 pm

couldd this crypt a bot so it makes it undetectable
whats the pass word to the download link

.Astro - January 27, 2011, 5:00 pm

Chance of releasing the crypter as a free for all.

50/100 ..

Don't scan on VirusTotal ..

Magikarp - January 27, 2011, 5:01 pm

Ace... I honestly decrypted it fully... sent you what I had... its not working lolz..

.Astro - January 27, 2011, 8:03 pm

And just letting you know, sending me a PM about the crypter password not working isn't going to help you. I ignore any of those PM's sent to me. If it worked for some people, it'll work for you guys if you know what the hell you're doing.

.Astro - January 28, 2011, 9:44 pm

Alright, got ti down to 2/16.

Fuck RunPE :l

funky_munky - January 29, 2011, 1:56 am

Tnx Ace for the crypter!!

Did anyone get their servers running after crypting?

If yes which Rat/keylog did you use?

psycho180 - January 29, 2011, 3:14 am

someone help me.. i've wasted 2-3 hours but still m not able to decrypt the pass
plzz help me out..

.Astro - January 29, 2011, 10:59 am

Quit asking for help on the password ...

br//0k3/n - January 30, 2011, 9:35 pm

Thanks man ;) As an amateur, I hope some day to become much more than a script kiddie and actually help the community. ^^

Arya Stark™ - January 31, 2011, 3:07 am

Can somebody tell me a good site for decrypting except crypto.com

Siro007 - January 31, 2011, 3:18 am

I dont understand that xD 1337 lalala ..

Zeromusx - January 31, 2011, 4:04 am

Looking forward to using this. And at least its not a INSANELY hard password to decrypt!
Thanks for this man

ichosemypath - January 31, 2011, 4:22 am

Very nice, good quality.

Thanks OP.

BBQiswin - January 31, 2011, 5:16 am

Thanks Alot, Crypted Beautifully!

Zhen. - January 31, 2011, 6:03 am

sorry to say this bro, but decrypted your password and entered it in the website. But its still saying Wrong Password. Could you please renew your upload file or the password. Thanks in advance :D

.Astro - January 31, 2011, 7:09 am

I won't change the password, production on this crypter has stopped and it's a private crypter for just me.

/Gf leechers.

zazter - January 31, 2011, 10:23 am

WTH? The password came logical starts with M** (not giving out) but still says wrong

Tartarus. - January 31, 2011, 12:55 pm

Decrypted succesfully, but it says "Wrong password"?

Weedzor - January 31, 2011, 2:05 pm

If yes which Rat/keylog did you use?

Noo.. my server dont start either, using cybergate 1.07.5..

But it shows 4/16 on NoVirusThx.. :)

dr-genix - January 31, 2011, 3:00 pm

hahahaa :d pass is : Modded by Pyratepig

.Astro - January 31, 2011, 4:04 pm

(Jan 31, 2011 04:00 PM)dr-genix Wrote: [\[CITE\]](#) hahahaa :d pass is : Modded by Pyratepig

Download link has now been deleted. Lol, perfect example of why the FUD version isn't released to the public.~
