Is tbot a modified version of kbot, or the other way around, or neither?

The Holy Shit. - January 22, 2011, 6:43 pm

I believe TBOT was coded before kBot, but i could be wrong, and no, t0fx's code isn't in TBOT

viewings - January 22, 2011, 6:44 pm

omfg omfg i can't wait till christmas

vouch for Pi Eater... LEGIT

.InSaNe - January 22, 2011, 7:43 pm

Tbot is leaked dude.

Soo yahh

The Holy Shit. - January 22, 2011, 7:56 pm
Not the v3.0 dude.

Soo yahh

Oxycodone - January 22, 2011, 8:05 pm
2.0 was leaked, not 3.0

& this one is a bit more stable then 2.0

PI3 - January 22, 2011, 8:16 pm
I vouch for Pi Eater, legit service, fast, safe, and easy to follow.

Vouch for eater, very legit and crazy coder :)

xvisceral - January 23, 2011, 8:56 pm
If somebody already bought, why would somebody else want to buy?

The Holy Shit. - January 23, 2011, 10:00 pm
Because they could add to it, and make a new bot, If someone already bought your bin, why would anyone else want another?

BruceTheMoose - January 24, 2011, 1:51 am
What's new in 3.0 that wasn't in the leaked version?

Oxycodone - January 25, 2011, 1:43 pm
@Tag, this bot is FUD & the preformance (spelling fail) & stability have been improved. ect..

The Holy Shit. - January 26, 2011, 8:05 am
Features have also been removed to re-fud it, and add to the stability. Along with fixed bugs like the Remove function.
