Welcome to another Graphics Bootcamp thread!

This is simply a Prologue, meant for artists completely new to Photoshop. This will teach you the basic layout of Photoshop, where all the features are located, and a brief description of some of them. Enjoy everyone!

Hey Rhythm,

I'll be following your tutorials without a doubt because I want to learn gfx. However, for me(I'm not sure if it's just me) the image won't refine itself to a clear view. It's always blurry.

Also, Thank you for taking time out of your life to help beginners such as myself. I appreciate your help greatly.

Great tutorial man.

You did an awesome job.
