Thread: [Is your iDevice not jailbroken/unlocked yet? Click here now! :\)](#)

antigrav - January 22, 2011, 8:22 pm

Welcome.

As many know by now, I like to say I'm pretty good with iPods, iPhones, iPads, iDevices in general. I don't own a Mac though. Too expensive. o.o

Anyways, I know a LOT of people that haven't jailbroken/unlocked their iDevices yet. This really confuses me, because people should know by now the advantages of Jailbreaking/Unlocking.

Table of Contents:

What is jailbreaking?

Why should I jailbreak? What are the advantages?

Why should I come to you for jailbreaking? Why not just learn myself?

What is jailbreaking?

Well, have you ever really taken a look at your iDevice? Asked yourself, "Man, shouldn't this be a lot better?" You might not have, yet. Well, jailbreaking fixes all that. Think of your iDevice as something full of potential. All that potential has been put behind bars. I can help you get out of those bars, release it's full potential. You can do so much that Apple won't let you do. Got an iPhone? Ever wish you could get off that stupid AT&T plan, and use T-Mobile? Ever wish you could record a video instead of just taking some pictures? Ever wish you could have that cool lock that Androids have? (If you don't know the Android Lock, look it up. It's so cool.) Well, when jailbreaking, you are practically tearing those bars to shreds, releasing your iDevice's full potential. That's why I'm here.

Advantages of Jailbreaking:One of the most popular reasons people jailbreak is Winterboard! This lets you customize your iDevice to almost anything! A normal iDevice is just some boring black screen with apps on it. A jailbroken iDevice will have a custom slider, wallpaper, and even custom app icons!

Another reason people jailbreak is Cydia, the JB'd App Store. It is your door to jailbroken themes, utilities, and entertainment.

People also jailbreak because of all the possibilities. One of the things I currently have is called 5 Column SpringBoard, which lets me have 5 columns on my spring board instead of the normal, boring 4.

Something you can do when jailbroken is called unlocking. This lets you use an iPhone with a plan other than AT&T, which is the only carrier they use. (I believe there will be a Verizon iPhone coming out Feb. 10th, but it'll be a different model. If you want an AT&T iPhone on Verizon, get unlocked.)

So... now is the question that's been on your mind since the beginning.

Why come to me for jailbreaking/unlocking? Why not just do it yourself?

The answer is; people mess up when jailbreaking. People can do something called "brick" the iDevice, which means what it is. Your iDevice literally becomes a non-functional brick. That is NOT fun. However, I guarantee that whatever I do will NOT brick your iPhone.

I have jailbroken/unlocked many iDevices already, and have lots of experience.

I will do any iOS. If you don't know what an iOS is, it doesn't matter. I can teach you that over MSN.

So what the hell are you waiting for? Drop me a PM today to learn how to jailbreak!?

I will be charging you based on the following: Jailbreaking, and the iOS jailbroken.

For iOS 3.x (3.1, 3.1.2, 3.1.3, etc.) I will charge just \$0.50 to teach you how to jailbreak and some useful jailbroken apps that you can't get without JBing.

For iOS 4.1 or later, I will charge just \$1.00 to teach you how to jailbreak and some useful jailbroken apps that you can't get without JBing.

Unlocking, and the iOS unlocked.

For iOS 3.x, I will charge just \$2.00 to unlock your iPhone to use with any phone carrier, so you don't have to be stuck on AT&T.

For iOS 4.1 or later, I will charge just \$2.50 to unlock your iPhone to use with any phone carrier, so you don't have to be stuck on AT&T.

Payment can be made through PayPal only.

All my money will be going towards HF L33T or HF UB3R... after UB3R I suppose I'll use my money for personal needs. :)

So, don't wait, PM me today! ?

iiTzUncleSam - January 22, 2011, 8:23 pm

What a nice post.

I can honestly say, I enjoyed reading that.

Good luck on sales.

antigrav - January 22, 2011, 9:33 pm

Thanks :) I've got lots of experience in this area, and this is how I plan to get HF L33T/HF UB3R.

antigrav - January 22, 2011, 11:30 pm

And no, I will not physically come to you and JB/unlock :)

I will walk you through every step over MSN, and tell you what tools you need and some good things to get after JB'ed.

antigrav - January 23, 2011, 12:24 pm

Bump. So, anyone interested yet? I'm not that trusted because of my low post count o.o but we all have a low post count when starting out, right?
