Thread: [Deface Website--Dot net nuke Hacking - Portal Hacking --> Deface Website Completly](#)

hellrockinworlds - January 23, 2011, 1:33 pm

First of all I want to say, I have leeched this thread -- sorry for that But as site and threads are copyright so I just copied the image to share here..i took "screen print" for option which were not already images.... so that whenever author checks his threads in his copyright panel he doesn't get this link..?

I have tried my best to share.... Thanks..

[img]http://www.worldofhacker.com/image/dnn2.png[/img]

If you get like this than only you can proceed further

[img]http://www.worldofhacker.com/image/dnn3.png[/img]

Select file option

Have Fun... As this thread was copyright so i took "screen print" for option which were not already images.... so that whenever author checks his content, than he doesn't get the link..

Thanks

Is this like website hacking? Defacing a website? I`m gunna try and see what it is lol.

hellrockinworlds - January 23, 2011, 1:42 pm

yup.. you can upload your shell in the last option as says upload file and than deface the complete website...

If you have any problem ask here, I will try to help you :)

Maradonnie - January 24, 2011, 6:16 am

Btw, u forgot to put in the javascript code to upload your own file. Here it is: Code
javascript:__doPostBack('ctlURL\$cmdUpload','')

L0ckreaderz - January 24, 2011, 8:45 am

It works but it's so difficult to find these sites !

Break - January 24, 2011, 11:36 am

If you leeched this give credit to the people who made it.

TheUzuki.' - January 24, 2011, 1:02 pm

you only can't upload html or php files..

are there any shells that are not coded in php or html ..

Upload shell with php bro there are lots of shell in google search c99 or r57 and more yo will find many of them have fun..?

jalal77 - January 25, 2011, 6:46 am

bro after i replace code i got three option.i click on file(a file of this site)but here i cant see any root or browse option for upload my shell.help mee plzz.

TheUzuki.' - January 25, 2011, 6:54 am

Yeah I know that there are many shells in php !

But this uploade function doesn't allow php !

You can only uploade a Picture or a .doc or a .zip !

saurovhacker - January 25, 2011, 7:10 am

Let me inform the author about this..i know him :P

GOod one bro

Nook1e - January 25, 2011, 9:33 am

I can't upload things to pages which it should work with. There isn't the "browse" button to choose what file I want to upload.

TheUzuki.' - January 25, 2011, 9:45 am

Code javascript:___doPostBack('ctlURL\$cmdUpload','')

You have to put this javascript in your adressbar !

Just behind the URL? Or where I do exactly have to put this script?

Le Jeu Avant Tout - January 25, 2011, 10:41 am

nice tut will help alot of people

bdteam - January 25, 2011, 11:26 am

Nice try .. i saw it some other site :)

hellrockinworlds - January 27, 2011, 7:20 am

javascript:___doPostBack('ctlURL\$cmdUpload','')

Just put this javascript in address bar.... replace the address bar with the above javascript code....

Have fun.... Hacking

SIM-135152 - January 27, 2011, 8:38 am

thanks but i think it's leeched
just put the writer name

Welll I cannot write i dont have authority now to edit.

j3fk - February 9, 2011, 3:17 am

How do I get the shell to upload...I'm stuck with Uzuki as to how and bypass the php and html restrictions...

Dealer-cc - February 9, 2011, 5:36 am

I really like the effects in this totorial , so manny different ways to go

QuantumX - February 24, 2011, 8:22 am

I uploaded the shell..
What now?

QuantumX - February 24, 2011, 8:24 am

Im stuck,
I uploaded the shell but how can i go to the shell?
Can anybody help me????
Thanks in advance!
sss

hellrockinworlds - February 24, 2011, 9:46 am

go to your shell url and deface the page...

If you want Give me URL I can show you....

bb123 - February 24, 2011, 11:10 am

okay well here is a site i posted for anyone who can deface there site will get 10.000\$ and a job the site is... <http://blackbergsecurity.us/> but if it was me i would just hack it to prove security aint shit anymore but im not that great at hacking yet, but getting there.

d0rk-Influence - February 26, 2011, 2:01 am

Or be smart and learn XSS and simply use javascript to deface the page like a boss like me does. :)

??@\$T3R ?ÚTL3H™? - February 26, 2011, 2:08 am

u can upload an asp shell and btw this is not hacking this is an remote upload vulnerability and this is 5 years old btw :S

Muggsy - February 27, 2011, 5:18 pm

I keep on getting

"The page cannot be found"
Is this what most people get?
or is this just me?
Help?
Thanksss

If you are doing it to a free webhost then yeah it will do that because they will suspend your account, are you actually defacing a SITE or just testing on your host?

P-Kito - April 18, 2011, 4:55 pm

I uploaded the shell, what is the link to access it when I uploaded it to Root?

Greets
Kito
Found it.. it says: "Cannot open bla bla.. ,it contains errors"

hackBoTneT - May 21, 2011, 10:24 am

What's Explained here?? Nothing!!

RussianFederation - May 21, 2011, 10:40 am

Old but very nice tutorial, goodjob.

mager123123 - May 21, 2011, 10:22 pm

Guys when i upload my image file, how can i see it has been defaced? I go back to the website, nothing is there?

Like how can i view the image i uploaded on the site?

ced.feludas - April 10, 2012, 10:59 pm

Does this still work? I really doubt. It's an age-old method and possibly had been fixed. However, I am not sure.
